

All kitchen cabinets are built as Framed (the traditional American style) or Frameless (also known as European style). You can determine your style of cabinets in two different ways:

1 LOOK AT CABINET BOX CONSTRUCTION

Framed

A face frame is attached to the front of the cabinet box.

Frameless

No face frame is attached to the cabinet box.

2 LOCATION OF WHERE HINGE IS ATTACHED

Framed

Door hinges are attached to cabinet frame.

Frameless

Door hinges are attached to cabinet box.
