

# **DURABUILD DOOR FEATURES**

### **DuraBuild Doors**

#### Construction

DuraBuild doors are built without failure points. Our high-tech film wraps around the door frame and is permanently held in place when the center panel is inserted and the door is assembled. It's a superior design.

Heat Resistance

DuraBuild doors are impervious to heat up to 212 degrees. Try it. Put a sample in your oven at home for as long as you like.

Water Resistance

The film used in DuraBuild doors is permanently 100% waterproof. We've tested our assembled doors by splashing them, dunking them, leaving them in the rain for weeks, and placing them in 100% humidity test chambers for up to 30 days.

Warp Resistance

DuraBuild doors are perfectly balanced, meaning they have exactly the same material on the front and back. They are very stable and highly resistant to changes in temperature and humidity.

## Thermofoil Vinyl Doors

Thermofoil doors are fiberboard with a vinul film glued on one side. If this glue loosens over time, the vinul delaminates or peels off the front of the door. Age and heat exposure are common causes of delamination.

Thermofoil doors use a heat sensitive glue. The heat from an oven, stove, or dishwasher can soften this alue and cause delamination. Test a sample in your oven.

The joint between the vinul face of a thermofoil door and the melamine back is a weak point for moisture penetration. Hanging a wet dishtowel over a thermofoil door can be enough moisture to cause swelling damage. These doors very frequently fail the Kitchen Cabinet Manufacturers' Association (KCMA) water resistance test.

Thermofoil doors have vinul on the front and a thin melamine coating on the back. This causes heat and moisture to penetrate at different rates, stressing and warping the door. It's an inherently unbalanced construction

## **APPEARANCE**

have sharp square corners. The grain direction on the moldings matches the direction in a real wood door. economically offer any of those features.

## LIFETIME WARRANTY

We are proud of our products, and we stand behind them. That's why we offer a lifetime, transferable warranty on all our doors, drawers, hinges and hardware. If any of these products fail during normal use, we will provide a free replacement product.
